Chronic Pelvic Pain **Relief Treatment**

If you suffer from chronic pelvic pain,

Pudendal Nerve Block

may be the right treatment.

Chronic Pelvic Pain Relief

Now Offering Pudendal Nerve Block Procedure

ECPC Pain Specialists is now offering the Pudendal Nerve Block Procedure for chronic pelvic pain. Pudendal Nerve Blocks are for patients suffering chronic pelvic pain, from accidental falls on the tailbone, cycling, squatting exercises, bio-mechanical abnormalities, chronic constipation, discomfort while sitting down, bladder irritation, pain during sexual intercourse, as well as pain brought on prior to or after childbirth, among others. Pudendal Neuralgia is defined by pain in the pudendal nerve trajectory in the pelvis, perineum and external genitalia. Symptoms include increased sensitivity, stabbing or aching pain, abnormal temperature sensations, burning and numbness.

- Immediate Relief
- Outpatient Procedure
- Low Risk Procedure

Pudendal Nerve Blocks are an effective means to reduce discomfort in the pelvic area. They can be performed under X-ray guidance with a small amount of local anesthetic. Patients can expect almost immediate relief upon completing the procedure. Pudendal Nerve Blocks are minimally invasive procedures with low risks.

We now accept referrals for patients who may benefit from receiving Pudendal Nerve Blocks for pelvic pain relief. Please call our offices below to schedule a referral appointment today.

ECPC Pain Specialists complies with applicable federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, or sex.
